

# Aluminium Chair Group

**vitra.**

The Aluminium Chair is one of the great furniture designs of the twentieth century. Charles and Ray Eames conceived and developed this chair in 1958 for the private residence of an art collector in Columbus, Indiana (USA). For its construction, the designer couple departed from the principle of the seat shell, instead stretching a panel of fabric or leather between two aluminium side members to create a taut but elastic seat. The chair adapts to the body of the sitter and is exceedingly comfortable, even without elaborate upholstery.

The Aluminium Group includes several different models for use in homes, offices and public spaces. Thanks to this wide range of models, a variety of aluminium bases with a polished, chrome-plated or black powder-coated finish, and a large selection of colours for fabric or leather upholstery, the perfect Aluminium Chair can be found for every environment. This outstanding quality allows us to offer a 30-year warranty\* on all the chairs in the Aluminium Group.

\*To benefit from the extended warranty, your product must belong to the Eames Aluminium Group and have been purchased from a certified dealer after 1 September 2003. You have three months to register your product from the date of purchase.

# Aluminium Chairs EA 101, 103, 104 - Dine

vitra.

The seat geometry of the three models EA 101, 103 and 104 is designed for comfortable dynamic sitting at a table, and the chairs are lighter, narrower and higher than the other models in the Aluminium Group. Thanks to the option of fabric or leather covers in a wide selection of bright or muted colours, it is easy to find the perfect chair for any dining room setting. The models differ with regard to the type of base – fixed or swivel – and whether or not they have armrests.
