

Aluminium Chair Group

vitra.

The Aluminium Chair is one of the great furniture designs of the twentieth century. Charles and Ray Eames conceived and developed this chair in 1958 for the private residence of an art collector in Columbus, Indiana (USA). For its construction, the designer couple departed from the principle of the seat shell, instead stretching a panel of fabric or leather between two aluminium side members to create a taut but elastic seat. The chair adapts to the body of the sitter and is exceedingly comfortable, even without elaborate upholstery.

The Aluminium Group includes several different models for use in homes, offices and public spaces. Thanks to this wide range of models, a variety of aluminium bases with a polished, chrome-plated or black powder-coated finish, and a large selection of colours for fabric or leather upholstery, the perfect Aluminium Chair can be found for every environment. This outstanding quality allows us to offer a 30-year warranty* on all the chairs in the Aluminium Group.

*To benefit from the extended warranty, your product must belong to the Eames Aluminium Group and have been purchased from a certified dealer after 1 September 2003. You have three months to register your product from the date of purchase.

Aluminium Chair EA 105, EA 107, EA 108 – Conference

vitra.

Charles & Ray Eames, 1958

Thanks to their generous proportions and resilient sling seat – a panel of leather, fabric or mesh stretched between two aluminium ribs – the Aluminium Chairs EA 105, 107 and 108 offer superb comfort. And with such a wide selection of upholstery colours, it is easy to find the perfect chair for every purpose. The EA 108 with armrests has a swivel mechanism, while the EA 105 without armrests and the EA 107 with armrests feature a fixed base.
